British Birds

Comprehensive index to volume 64 1971

25p

Volumes for binding should be sent not to the publishers but direct to the binders, P. G. Chapman & Co Ltd. Full instructions are given on pages 2 and 4 of this cover and these are the same as on the short index. Please note that the pagination of the short index is the same as that of the first six pages of the comprehensive index, as the latter is intended to replace the former. The short index will therefore not be included in bound volumes which have a comprehensive index unless the binders are specifically asked to do so. Nevertheless, the short index should be sent to the binders with the comprehensive index (but only one binding form completed) as the title page and list of illustrations will need to be taken from it.

Comprehensive index

Compiled by Mrs N. D. Blamire

Entries are in a single list with references to:

(1) every significant mention of each species, not only in titles, but also within the text of papers, notes and letters, including all those appearing in such lists as the 'Report on bird-ringing for 1969', the 'Recoveries in Great Britain and Ireland of birds ringed abroad' and the 'Report on rare birds in Great Britain in 1970', but excluding 'Requests for information', 'News and comment' and 'Recent reports';

(2) scientific nomenclature under generic names only and almost entirely following Dr C. Vaurie's *The Birds of the Palearctic Fauna* (1959-65);

(3) authors of all papers, notes, reviews and letters, and photographers; papers are referred to by their titles, other contributions as 'note on', 'review of', etc.;

(4) a few subject headings, i.e. 'Breeding', 'British and Irish list', 'Display', 'Editorials', 'Field-characters', 'Food', 'Migration', 'News and comment', 'Obituaries', 'Recent reports', 'Recorders' and 'Requests for information';

(5) 'Reviews', which are listed together under this heading in alphabetical order of authors reviewed.
